Be.Neutral – Mobility Strategy for Carbon Neutrality in Cities

Be.Neutral seeks to position Portugal as an exporter of cyber-physical zero-carbon mobility products to cities around the world. Its design arose from an opportunity to develop, industrialise, and operate new mobility products and services (physical devices, connectivity and data science platforms) that are able to quantify the emissions avoided in real time so as to accelerate carbon neutrality by 2030.

The participation of 3 DRIVERS seeks to develop methodologies of quantification and assessment of environmental impacts and apply them also in the development of new sustainability indicators.

TOTAL INVESTED IN THE STRATEGY: 221.376.867,92€

INVESTMENT BY 3 DRIVERS: 771.071,26 €

PROJECT NAME

Be.Neutral – Mobility Strategy for Carbon Neutrality in Cities

TOTAL INVESTED IN THE STRATEGY | 221.376.867,92€

INVESTMENT BY 3 DRIVERS | 771 071,26 €

MEASURE | Green Innovation for Businesses

BENEFICIARY | 3 DRIVERS, ENGENHARIA, INOVAÇÃO E AMBIENTE, LDA.

START DATE | 1 October 2021

COMPLETION DATE | 31 December 2025

TOTAL FINANCIAL SUPPORT TO THE STRATEGY | 128.191.402,26€

FINANCIAL SUPPORT TO 3 DRIVERS | 462 085,57 €

OBJECTIVES AND EXPECTED OUTCOMES

Be.Neutral seeks to position Portugal as an exporter of cyber-physical zero-carbon mobility products to cities around the world. Its design arose from an opportunity to develop, industrialise, and operate new mobility products and services (physical devices, connectivity and data science platforms) that are able to quantify the emissions avoided in real time so as to accelerate carbon neutrality by 2030.

The participation of 3 DRIVERS seeks to develop methodologies of quantification and assessment of environmental impacts and apply them also in the development of new sustainability indicators.
